

Week Report 0

Summary of Presentation: Introduction to CIS 106

In this week's presentation we have gone over the course prerequisites including understanding basic computer literacy and how to prepare our learning environments well as why we should learn linux.

My Github account

The screenshot shows a web browser with multiple tabs open, including 'Activity - Passaic County Cor...', 'Assignments - LINUX FUND...', 'Homework 0 - Linux Fundam...', 'Git vs. GitHub: What's the dif...', and 'Mennaeab'. The address bar shows 'github.com/Mennaeab'. The browser's bookmark bar includes links to Apps, Apple, iCloud, nu.nl, Bing, Google, Wikipedia, Facebook, Twitter, LinkedIn, Yelp, TripAdvisor, Malmberg Startpa..., and Reading List. The GitHub navigation bar includes a search bar, 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. The profile page for 'Mennaeab' is displayed, showing a green and white pixelated avatar, the name 'Mennaeab', an 'Edit profile' button, and a status 'Joined 15 minutes ago'. The 'Overview' tab is selected, showing 'Popular repositories' and a message: 'You don't have any public repositories yet.' Below this, a '1 contribution in the last year' section features a contribution graph with a single green square on January 1st. The graph includes a legend with 'Less' and 'More' options. A text box explains the contribution graph and provides a link to 'Read the Hello World guide'.

Final Project Research: Pick a Project

For the final project I picked, Building a portable hacking machine with a Raspberry Pi and Kali Linux.
