

# Week Report 1

---

## Summary of Presentation: Introduction to Linux

In this week's presentation we learned about user interfaces and the difference between the command line and graphical interface. We also learned about the history of linux and system requirements as well as what Ubuntu and Debian operating systems are.

## Final Project Research Questions and answers

1. What is the problem that you are trying to solve with this project? The creation of a hacking device although used for wrong reasons activates creativity and through that curiosity i'm hoping to find out what is more to it.
2. What are the names of the technologies involved? Raspberry Pi
3. What are the system requirements for the project? Kali Linux
